The usage of starlink

Factory production | Available for immediate purchase | Delivery on schedule

About This Starlink Bracket Suit

Well Fit: Design for the Starlink V3 dish antenna, it easily attaches to poles with diameters from 1 inches(25mm) to 2.1 inches (53mm), ensuring stable and reliable signal reception.

Flexible Adjustment: Featuring 360-degree rotation and 20° tilt, Extend the socket by an additional 70mm, it ensures the dish antenna is always accurately positioned at the pole's zenith for optimal signal reception.

Secure Fastening: Equipped with 12 screws and a hex key, the 6 screws form a stable triangular structure, ensuring not only greater stability but also facilitating alignment during installation

Robust Support: Made from integrated die-casting with aluminum alloy, it is sturdier compared to those made from other plastics and iron, it boasts a high load capacity of up to 550 pounds, ensuring it remains firmly secured to the pole even during hurricanes or other extreme weather events.

Easy Installation: Installation is easy— simply insert the Gen3 bracket into the antenna slot, then attach the pole to the pipeline adapter and tighten the screws. Additionally, the screw tightness can be adjusted according to the pole's size.
