Item	Standard Starlink Gen3 V3 Bracket Suit
------	--

Material	Carbon Steel
Color	Black
Screw	Equipped with Screws and Installation Tools
Compatible Devices	Metal Bracket For Starlink Gen 3

About This Starlink Bracket Suit

Well Fit: Designed for the Starlink V3 dish antenna, it easily attaches to poles with diameters from 1 inch (25mm) to 2.1 inches (53mm), ensuring stable and reliable signal reception.

Flexible Adjustment: Featuring 360-degree rotation and 20° tilt, extend the socket by an additional 70mm to ensure the dish antenna is always accurately positioned at the pole's zenith for optimal signal reception.

Secure Fastening: Equipped with 12 screws and a hex key, the 6 screws form a stable triangular structure, ensuring greater stability and facilitating alignment during installation.

Robust Support: Made from integrated die-casting with aluminum alloy, it is sturdier than plastic or iron alternatives, boasting a high load capacity of up to 550 pounds, remaining secure even in extreme weather.

Easy Installation: Simply insert the Gen3 bracket into the antenna slot, attach the pole to the pipeline adapter, and tighten the screws. Screw tightness can be adjusted according to the pole's size.
