Product Description

Manual Pry Bar for Crate Clip Removal

Open compatible wooden packaging fasteners with a TIANPIN crate clip removal tool. The flat handle provides leverage while its bent end engages the release slot in the clip. This listing covers one type of manual removal bar, shown from several angles and in an application sequence.

Tool Overview

Brand	TIANPIN
Product type	Manual crate clip removal pry bar
Application	Compatible wooden or plywood box clip fasteners
Configuration	Flat handle and bent engagement end
Fit selection	Match the tool tip to the clip release slot and joint clearance
Dimensions, material grade and finish	To be agreed in the tool drawing and quotation
MOQ	500 pieces; subject to TIANPIN quotation confirmation

Check Compatibility Before Ordering

Provide a close-up photograph of your clip, the release-slot measurements and an image of the assembled crate corner. The tool must fit the slot with enough room for the handle to move. Do not choose a removal bar from panel thickness alone. Please request a sample fit check for your selected fastening arrangement.

Opening a Clip-Fastened Box

Stabilize the box and support the panel or lid being opened.

Locate the clip release opening and seat the bent tool end securely.

Move the handle gradually to disengage the fastener, keeping hands outside its release path.

Set the released hardware aside and examine the clip, bar and panel before reuse.

> The photographs illustrate engagement and leverage. They do not establish tool dimensions, a force rating or compatibility with every crate clip. Hand installation of a matched C057/C058 clip and tool-assisted removal are separate operations.

Frequently Asked Questions

Is the crate clip included?

Clips and removal bars are separate items. State whether your enquiry is for tools, clips or both.

Can I order this bar for an existing box?

Yes, send the existing fastener and joint details for fit review before ordering.

What are the price, packing and lead time?

TIANPIN will confirm these for the requested quantity and destination. No fixed unit weight, carton specification or delivery period is stated here.
